- ◆ Exhibits should be called in and examined in detail. Judges should be looking for the cleanliness of the horse, handler and harness/bit. Running a hand over the horses’ coat and opening the mane and tail to assess the cleanliness is highly desirable. A plaited horse should not be given preference over a flowing mane.
- ◆ Handler may be in either western or English wear and should be wearing a hat and gloves.
- ◆ Conformation is not considered.

#### JUDGING COAT COLOUR CLASS

- ◆ No workout is required for this class. Exhibits may be paraded around the ring prior to being called in. Judges should not wear sunglasses when judging this class.

#### JUDGING MANE & TAIL CLASS

- ◆ No workout is required for this class. Exhibits may be paraded around the ring prior to being called in.
- ◆ Judges must physically open up the mane and tail when judging this class to determine the purity of colour, texture, silkiness and quality, condition and cleanliness.
- ◆ The mane and tail should be silver, ivory or white and uniform in that colour. Any dark hairs are considered a colour fault.
- ◆ The longest, thickest mane and tail may not necessarily be the best in the class.
- ◆ Conformation is not considered.

#### JUDGING A COSTUME CLASS

- ◆ When judging a palomino costume class, the costume must not come below the knees of the horse. No high heel shoes are permitted on the rider.
- ◆ This class requires that the horse complete a workout so all safety aspects must be adopted.

### PART 3 CLASSIFICATION

\*\*\*Official classifiers must notify the Secretary, to gain approval to classify, prior to a classification taking place.\*\*\*

Any horse being presented for classification should first be inspected for the following faults. If any of these faults are present, registration is denied.

Cryptorchidism, monorchardism, anorchardism, overshot jaw, undershot jaw, offset canons, cloven hoof, nasal or vaginal discharge, umbilical hernia, ringbone, sidebone, pneumo vagina, blue eyes.

When looking at any palomino for classification the Official Classifier should firstly look at the body colour and mane and tail of the animal. This must be in line with the description “What is a Palomino” on page 2 before progressing further with the classification. Depending on the time of the year, as coat colour can change, it will be at the Classifier’s discretion whether to accept the coat colour as presented on the day.

Roaning. (also known as ticking) If a horse presents with ticking on areas of the body due to Arabian breeding then classifiers will determine the eligibility of registration. Skin under all areas of ticking must be dark. Classifiers are to mark horses, with ticking, down in both their body colour score and their roaning score. Horse with ticking in their coat may not score sufficient marks to pass their colour score and then registration will not proceed.

When classifying, the criteria as per the Classification Sheet must be met, i.e. points must total those required for registration by both Classifiers. TWO classifiers are required for stallions and stud book mares. Geldings can be viewed by one Classifier.

Geldings (not requiring proof of breeding) should not pass classification if conformation defects are seriously affecting the health, performance or well-being of the animal.

Palomino Stallions and Mares with proof of breeding and that Classifiers have passed on inspection will be registered in the Stud Book of the Society.

Appendix and foundation mares with no proof of breeding and geldings who have passed on inspection will be registered in a Registry of the Society.

#### ADULT REGISTRATION.

Members must contact a member of Committee to arrange for a classification. A sight classification will be arranged if possible, otherwise classification will be done via photographs. Any horse accepted for registration on photographs will have the Registration Card marked NSC. This stands for Not Sight Classified. If a horse is subsequently sight classified a new Registration Card will be issued upon the original being returned.

A palomino failing classification may be presented again on a further two occasions. All horses/ponies being presented for classification must be in a clean and tidy condition and must be of a tractable manner and handled properly. If not previously foal recorded, proof of breeding where possible must at all times be included with the application. Mane must be 10cm in length for assessment.

The N.S.W. Palomino Society Inc. retains the right to recall any horse’s registration with the Society at any time.

Acceptable forms of identification are visible brands or microchip– provided this has been scanned and confirmed by a vet in writing.

#### STALLIONS.

All stallions should be sight classified by two Official classifiers and both must attain a pass mark for the stallion to be accepted into the Society.

A Veterinary Certificate of Soundness must accompany application.

Country stallions (or those living too far from classifiers) can be registered under the following conditions. Certificate will be marked with letters N.S.C.

- ◆ Must have a Certificate of Soundness from a qualified Veterinary Surgeon.
- ◆ A video showing the horse standing with view of both sides, front and behind.
- ◆ Action shots of horse walking away and back, and trotting away and back.
- ◆ Photos showing all markings on legs and face.

If the stallion is subsequently successfully sight classified his registration papers will no longer be marked N.S.C.

Stallions must have at least one registered parent, either with this Society or with another Society. A service certificate (original or copy) as proof of breeding or a copy of another breed registration is required. Registration fees must be paid at time of application.

If a stallion is gelded after registration then a certificate relating to this or receipt from Veterinarian must accompany registration certificate and sent to Registrar for amendment.

At the time of classification, registration fees must be paid.

#### STUD BOOK MARES.

All mares should be sight classified by two official classifiers. Otherwise photos will be accepted until such time as the mare can be sight classified and until such time her papers will be marked N.S.C.

These mares must have at least one registered parent, either with the N.S.W. Palomino Society Inc. or with another Society. At the time of classification, registration fees must be paid. A Service Certificate as to proof of breeding or a copy of another breed registration is required.

Although mares should be sight classified by two classifiers, in country areas one approved classifier is sufficient, however four (4) photos (1 each side, 1 front & back) must accompany application.

#### APPENDIX MARES.

All mares should be sight classified by two official classifiers. Otherwise photos will be accepted until such time as the mare can be sight classified and until such time her papers will be marked N.S.C.

Where a palomino mare has no proof of breeding she is to be entered in the Registry as a an Appendix mare until such time as the owners can provide proof of breeding whereby she could be upgraded to the Stud Book.

Appendix mares are permitted to show with the Stud Book mares in palomino classes at any show.

#### FOUNDATION MARES.

All mares should be sight classified by two official classifiers. . Otherwise photos will be accepted until such time as the mare can be sight classified and until such time her papers will be marked N.S.C.

These mares are the product of a registered palomino parent or have produced palomino progeny.

Proof of breeding is preferred if possible.

They are assessed only on conformation by the Classifiers.

A foundation mare or filly may be any colour.

Foundation mares can only compete in foundation mare classes in the show ring.

Foundation mares may also be used in handler/rider classes.

#### GELDINGS.

Should be classified by at least one official classifier, otherwise photos are required.

There are no restrictions on age and parentage requirements are not essential. If gelding was previously foal recorded as a colt then a Veterinary certificate or receipt from Vet as proof of castration is required.

Geldings will not be accepted for registration if conformation defects are seriously affecting the health, performance or well-being of the animal.

FOAL RECORDING

Should be sighted by at least one official classifier, otherwise photos are required. Application should be made on the Registration Application form. A service certificate should be attached if possible and/or any other breed registration certificates for this foal. Foals must be recorded before 12 months old. Palominos who are foal recorded must be presented for Adult Registration when 2 years old and prior to the age of 3 years old to retain breeding and showing rights.

QUESTIONABLY COLOURED PALOMINOS (updated 20.10.2011)

When a palomino is presented for classification, either by photos or sight, or due to the bloodlines, Classifiers may determine that the horse's colour is questionable. When this situation occurs owners will be directed by the Secretary that a DNA hair test must be undertaken prior to the horse being considered for registration. The Secretary will inform the owner of the procedure to be followed and all costs associated with this testing will be borne by the owner.
